FINISH SELECTIONS

POLISHED BRASS

Our polished brass finish is a smooth, just shy of mirror-grade, light-reflecting surface. We do not lacquer brass unless it is specifically requested, as the finish will age naturally to a mellower gold-brown patina over the years. CARE: Dust with a dry cotton cloth. To maintain the bright gold color, we recommend a non-paste polish such as “Nevr-Dull”.

POLISHED BRONZE

Our polished bronze finish is a smooth, just shy of mirror-grade, light reflecting surface. We do not lacquer bronze unless it is specifically requested, as the finish will age naturally to a mellower gold brown patina over time. CARE: Dust with a dry cotton cloth. To maintain brighter color, we recommend a non-paste polish such as “Nevr-Dull”.

BURNISHED BRASS

This mellow finish is achieved by hand rubbing our polished brass, lending a warm and softened tone to the metal. This finish will very slowly patinate over time to a golden brown hue. We seal this finish with clear wax. CARE: Clean with soft cloth. Use no abrasive cleaners.

BURNISHED BRONZE

This mellow finish is achieved by hand rubbing our polished bronze, lending a warm and softened tone to the metal. This finish will very slowly patinate over time to a golden brown hue. We seal this finish with clear wax. CARE: Clean with soft cloth. Use no abrasive cleaners.

ANTIQUÉ BRASS

This finish is obtained by polishing, oxidizing, and rubbing the brass by hand to create an aged look. It is traditionally finished with wax, letting the patina develop organically over time. CARE: Clean with soft cloth. Use no abrasive cleaners.

ANTIQUÉ BRONZE

This finish is obtained by polishing, oxidizing, and rubbing the brass by hand to create an aged look. It is traditionally finished with wax, letting the patina develop organically over time. CARE: Clean with soft cloth. Use no abrasive cleaners.

WEATHERED BRASS

Starting with a clean mill finish, the patina is hand worked across the brass surface creating rich, aged, low areas with brighter high points. It is traditionally finished with wax, letting the patina continue to develop organically over time. CARE: Clean with soft cloth. Use no abrasive cleaners.

POLISHED COPPER

Our polished copper finish leaves our factory with a bright surface and a russet-orange color. We wax the metal surface to slow, but not stop the natural aging process. As it ages, the finish changes color through a series of shades to light and dark chocolate browns and finally to a verdigris patina. The surface also becomes more matte. We do not lacquer copper. CARE: Clean with soft cloth. Use no abrasive cleaners.

OIL RUBBED BRONZE

Starting with a matte surface the patina is applied and allowed to darken further to a deep, warm brown-black and then rubbed by hand to bring up the natural highlights of the metal. It is traditionally finished with wax, letting the patina develop organically over time. CARE: Clean with soft cloth. Use no abrasive cleaners.

DARK WAXED BRONZE

Starting with a matte surface the patina is applied and allowed to darken further to a deep, warm brown-black. It is traditionally finished with wax, letting the patina develop organically over time. CARE: Clean with soft cloth. Use no abrasive cleaners. Maintain with periodic dusting. This finish will develop a verdigris look if exposed to a damp environment.

VERDIGRIS

Literally “Green of Greece” Remains verdigris is a dark patina finish that recalls the green oxidation on weathered brass, bronze, and copper. The metal is first blackened and then has salts applied to bring out the mottled green tones. Left outside this oxidation will slowly and beautifully progress. CARE: Wipe if necessary with damp cloth. Use no strong cleaners or abrasives.

POLISHED NICKEL

This bright and resilient finish is resistant to harsher conditions and humidity. A great finish for bathrooms and kitchens, it retains its luster without lacquer in damp environments. CARE: Clean with soft cloth. Use no abrasive cleaners.

BURNISHED NICKEL

This subtle finish is achieved by hand rubbing our polished nickel, softening its brightness while leaving some shine to the surface. An excellent alternative to Silver Plate for vulnerable areas like bathrooms. CARE: Clean with soft cloth. Use no abrasive cleaners.

FINISH SELECTIONS

SATIN NICKEL

The subtle and beautiful brushed lines of satin nickel create a low-luster alternative to polished nickel. This finish is often used to imitate steel. Satin nickel needs no lacquer. CARE: Clean with soft cloth. Use no abrasive cleaners.

SILVERPLATE

Our version of this classic finish is slightly tarnished and then repolished to bring out the lushness of silver. To slow down natural oxidation, silver plated fixtures are lacquered unless specified otherwise. Select items in the collection are provided in our handpolished unlacquered silverplate. CARE: Maintain with periodic feather dusting. Do not polish lacquered finishes or get them wet.

GERMAN SILVER

This patina is hand worked into a base surface of softly polished nickel to accentuate the details and approximate the look of antique silver. It is traditionally left plain, and the luster is easily maintained without lacquer. CARE: Clean with soft cloth. Use no abrasive cleaners.

LIGHT PEWTER

This patina is hand worked into a base surface of matte nickel to darken the low points and brighten the high points for a rich, silver gray aged look. It is traditionally finished with wax. The luster is easily maintained without lacquer. CARE: Clean with soft cloth. Use no abrasive cleaners.

DARK PEWTER

This patina is hand worked into a base surface of matte nickel to darken the surface to a deep, aged dark pewter and then rubbed by hand to bring up the natural silver highlights of the metal. It is traditionally finished with wax. CARE: Clean with soft cloth. Use no abrasive cleaners.

DARK IRON

This finish has patina hand worked into a base surface of nickel plating creating darkened low areas and rich silver high points. It is traditionally finished with wax, letting the patina continue to develop organically over time. CARE: Clean with soft cloth. Use no abrasive cleaners.

GOLD

We lay a thick layer of 24k lemony gold onto a semi-polished base and finish it by selectively burnishing the high points. CARE: Clean with soft cloth. Use no abrasive cleaners. Maintain with periodic dusting.

*Gold finishes are priced upon request.

DUQUETTE BRASS

Duquette Brass finish is a smooth light-reflecting surface. We do not lacquer brass unless it is specifically requested, as the finish will age naturally to a mellower gold brown patina over the years. CARE: Dust with a dry cotton cloth. To maintain the bright gold color, we recommend a non-paste polish such as "Nevr-Dull".

DUQUETTE ANTIQUE BRASS

This finish is obtained by polishing, oxidizing, and rubbing the brass by hand to create a dark aged look. It is traditionally finished with wax, letting the patina develop organically over time. CARE: Clean with soft cloth. Use no abrasive cleaners.

DUQUETTE BRONZE

Duquette Bronze is a rich, variegated finish with wonderful impressions of the hand cast process apparent in its surface. We do not lacquer bronze unless it is specifically requested, as the finish will age naturally to a mellower gold brown patina over the years. CARE: Dust with a dry cotton cloth. To maintain a brighter color, we recommend a non-paste polish such as "Nevr-Dull".

DUQUETTE ANTIQUE BRONZE

Duquette Antique Bronze is a rich, variegated finish with wonderful impressions of the hand cast process apparent in its surface, subtly darkened to accentuate the effects of age and weather. It is traditionally finished with wax, letting the patina develop organically over time. CARE: Clean with soft cloth. Use no abrasive cleaners.

DUQUETTE DARK BRONZE

Starting with a matte surface the patina is applied and allowed to darken further to a deep, warm brown black. It is traditionally finished with wax, letting the patina develop organically over time. CARE: Clean with soft cloth. Use no abrasive cleaners. Maintain with periodic dusting. This finish will develop a verdigris look in a damp environment.

DUQUETTE RUBBED BRONZE

Starting with a matte surface the patina is applied and allowed to darken further to a deep, warm brown-black and then rubbed by hand to bring up the natural highlights of the metal. It is traditionally finished with wax, letting the patina develop organically over time. CARE: Clean with soft cloth. Use no abrasive cleaners.

FINISH SELECTIONS

DUQUETTE PEWTER

This patina is hand worked into a base surface of matte stainless steel and nickel to darken the low points and brighten the high points for a silver gray aged look. It is traditionally finished with wax. The luster is easily maintained without lacquer. CARE: Clean with soft cloth. Use no abrasive cleaners.

DUQUETTE DARK PEWTER

This patina is hand worked into a base surface of matte nickel to darken the surface to a deep, aged dark pewter and then rubbed by hand to bring up the natural silver highlights of the metal. It is traditionally finished with wax. CARE: Clean with soft cloth. Use no abrasive cleaners.

DUQUETTE NICKEL

This bright and resilient stainless steel and nickel finish is resistant to harsher conditions and humidity. A great finish for bathrooms and kitchens, it retains its luster without lacquer in damp environments. CARE: Clean with soft cloth. Use no abrasive cleaners.

CUSTOM FINISHES

A wide range of metal and painted custom finishes are also available. We would be pleased to provide a quote based on the submission of your sample. Please contact us for details.

FINISH SAMPLES

Samples of our finishes are available for viewing at our showrooms. Please contact us to obtain an off-site sample.
